GLOBAL DEEP LEARNING LAB 2018

engage the world
change the world

April 16-18
Vancouver, Canada

Engage with some of
the most inspiring educators of our
time as the New Pedagogies for
Deep Learning network meets for its
annual Deep Learning Lab.

Here, the world's most energized educators
gather to stretch their imaginations, share their
work and reflect on the impact deep learning
is having on students and staff. Our common
purpose is fostering deep learning so that
all learners contribute to the common good,
address challenges and flourish in a complex
world. Join leaders, teachers, students, and
partners from Australia, Canada, Finland,
Netherlands, New Zealand, United States,
Uruguay and beyond.

April 16-17
DEEP LEARNING LAB
We welcome educators,
leaders, partners, students,
and parents.

April 18
NPDL Members will
continue collaborating.

Students at the Centre

We know that when students are given an opportunity to fly, they soar.

During the conference students from across the world will participate in a deep learning challenge. Prepare to be inspired.

Collaborative Moderation

Immerse yourself in a richly designed deep learning task and participate in an intensive collaborative examination of student work and classroom pedagogy.

Insight Sessions

Experience what deep learning looks like on the ground...in classrooms, schools and systems. Savvy practitioners from all over the globe share what they are creating and learning in their efforts to enhance learning for all students. There will be more than thirty sessions to choose from—and none of them repeated.
