A GLOBAL PARTNERSHIP

# New Pedagogies for Deep Learning

## A Global Partnership:

### An Invitation to Learn

#### WHO WE ARE

We partner with over 2500 schools in 16 countries, working with clusters and networks of schools to build knowledge and practices that develop deep learning and foster whole system change.

#### WHAT WE DO

We work alongside educators to change the role of teachers to that of activators of learning who design learning experiences that build on learner strengths and needs, create new knowledge using real-life problem solving and help all students identify their talents, purpose and passion.

#### WHY WE DO IT

We believe every student deserves to learn deeply. We support whole systems to transform learning — schools, provinces, states and countries who want to take action and impact learning.

#### WHO IS INVOLVED

We are joined by teachers, school leaders, families and policy makers worldwide who are seeking ways to transform pedagogies and provide the conditions that will facilitate deep learning.

## What IS Deep Learning?

Six deep learning competencies define what it means to be a deep learner. Deep learning experiences are engaging, relevant, authentic and build these 6 C's.

### Character

- Proactive stance toward life and learning to learn
- Grit, tenacity, perseverance and resilience
- Empathy, compassion and integrity in action

### Citizenship

- A global perspective
- Commitment to human equity and well-being through empathy and compassion for diverse values and world views
- Genuine interest in human and environmental sustainability
- Solving ambiguous and complex problems in the real world to benefit citizens

### Collaboration

- Working interdependently as a team
- Interpersonal and team-related skills
- Social, emotional, and intercultural skills
- Managing team dynamics and challenges

### Communication

- Communication designed for audience and impact
- Message advocates a purpose and makes an impact
- Reflection to further develop and improve communication
- Voice and identity expressed to advance humanity

### Creativity

- Economic and social entrepreneurialism
- Asking the right inquiry questions
- Pursuing and expressing novel ideas and solutions
- Leadership to turn ideas into action

### Critical Thinking

- Evaluating information and arguments
- Making connections and identifying patterns
- Meaningful knowledge construction
- Experimenting, reflecting and taking action on ideas in the real world

## How do we shift from Traditional to Deep Learning?

Four elements combine to create the new pedagogies and foster deep learning.

**Pedagogical Practices** are used to design, monitor and assess learning.

**Learning Partnerships** are cultivated between and among students, teachers, families and the wider community.

**Learning Environments** foster 24/7 interaction in trusting environments where students take responsibility for their learning.

**Leveraging digital** amplifies, accelerates and connects learners and learning.
